

M3 Partners
Exclusive Licensed
Distributor of the GLiFT.

Unmatched radiation protection and superior musculoskeletal injury alleviation.

The Patented GLiFT is a next generation radiation protection system that was designed to help alleviate the musculoskeletal issues that are associated with wearing heavy lead aprons.

US Patent No. 10,729,195

Unique Properties & Benefits

- GLiFT endoskeleton seamlessly integrates with our Standard Vest & One Piece Apron
- Revolutionary endoskeleton transfers lead vest weight off of your neck, shoulders & back
- Designed with extensive input from practicing healthcare professionals
- Core material available in lightweight lead and bilayer lead-free alternative

Usage

Already procured & actively utilized in Virginia Facilities & Commercial Hospitals & Clinics (Richmond VA, Atlantic Health, Hackensack and more).

Mayo Clinic Study

Mayo Clinic study shows that medical staff experience high rates of musculoskeletal pain, injury, & long term disability from traditional radiation vests.

The Patented GLiFT system offers targeted long term relief & safety. Your VA & Federal Medical personnel will have fewer injuries, lost work days, & disability claims.

Show your personnel that you have their back.

Exclusive licensed distributor of the patented GLiFT system, to the federal government, and its departments.

Licensed by Salus Scientific, the manufacturer of the GLiFT System.

Certified Service Disabled Veteran Owned Minority Small business. In business since 2013 providing services and equipment to the federal government.

"If you wear lead, you are carrying it on your shoulders. It makes sense to me to transfer that weight and put it on my hips. It leaves my spine free to move. Wearing the G LiFT is preventative." - Interventional Cardiologist South Carolina
